

E-Tech CEO Program

The Leadership Program of the
Global Education Innovation
Forum

- **The E-Tech CEO Program** for International Educational Leaders is a unique initiative that connects principals, educators, and senior figures from the world of education in various countries to discuss, share knowledge, and lead international initiatives in the field of education.
- **The program includes leaders** from high-tech companies aiming to introduce educational managers to high-tech tools for managing innovation in entrepreneurship and technology, and to explore how these tools can be used to improve global education.
- **The program focuses** on educational innovation, humanistic technology, developing an international infrastructure, and the exchange of knowledge between the worlds of high-tech and global education.

- The program consists of virtual international meetings held once a month.
- Independent module meetings. Participants join according to their managerial and personal schedules.
- Each module meeting includes two lectures:
 1. An innovation lecture by an education leader from across the globe
 2. A lecture by an expert from the "Dream Team" on topics related to high-tech tools for innovation and entrepreneurship.
